Gonzalo Martín Suarez

SOFTWARE DEVELOPER | WEB DEVELOPMENT STUDENT

(011) 3874-6212 • gonzalosuarez9977@gmail.com • CABA, Buenos Aires, Argentina • Portfolio • LinkedIn

Experience

FREELANCE DEVELOPER   March 2024 - **Present**
Self Employed

As a freelance developer, I specialize in the design and development of web and mobile applications, committed to delivering results that align with the goals and needs of each project, maintaining clear communication and a proactive approach at every stage of development.

SOFTWARE DEVELOPER   February 2024 - **Present**
Universidad Tecnológica Nacional

As a full stack developer, I specialize in developing applications from scratch, following each stage of the development process accurately. Additionally, I handle the implementation of new features, modules, and functionalities in existing applications. I also focus on resolving errors to optimize performance and enhance the user experience.

FUNCTIONAL ANALYST   April 2023 - January 2024
Universidad Tecnológica Nacional

Responsible for analyzing and determining requirements for software development projects. Focused on generating use cases and user stories, as well as creating various diagrams that comprised the analysis and design stages. In addition, I carried out QA testing tasks to guarantee the quality of the developed software.

Education

Technical Degree in Web Development   April 2021 - **Present**
Universidad de la Matanza

Primary and Secondary Education   January 2004 - November 2018
Macnab Bernal School

Relevant Projects

Moviltrack - Enterprise Management System   April 2025 - October 2025

Administrative web application that allows managing a company's commercial operations. The system includes an analytical dashboard, project management, clients, suppliers, products, and services. It also features modules for quotations, purchase orders, delivery notes, expenses, and recurring billing.

RIP Alive - Personal Legacy Application   June 2024 - August 2025

Mobile application designed to allow users to save all their important information in case of death, to inform family members of their final wishes. Users can store details about what to do with their belongings, key contacts, investments, personal and health information, and more. The application includes a built-in subscription system and a store for customizable products managed from the admin panel.

Diffusions - Bulk Email Sending Microservice   January 2025 - April 2025

Administrative web microservice designed for a university portal to manage and send mass email campaigns. The system includes recipient list management and a dashboard to monitor the status of each campaign. It also provides tracking capabilities to see which users have opened the emails. The email module features a rich-text editor, file attachments, and scheduling options for automated deliveries.
